

REMARKS

Very thanks for Examination's suggestion and thanks for finding some citations about the present invention, thereby, the applicant may know more information about the invention. This case has been carefully reviewed and analyzed in view of the office action.

Examiner has kindly provides reference prior arts about the present invention, and thus the applicant has more information about the invention. All details of the reference prior arts are fully considered and compared with the present invention.

Since in the office action, the tips are located on the threaded rods as a single straight line on the threaded rod is not disclosed in the prior arts, and thus applicant decides to cancel Claims 1 to 4, without prejudice or disclaimer of the subject matter thereof, thus to disclose steps to form a plurality of concave and corresponding convex portion on the forming nylon wire. The original claim 5, 6, 8 added the features and restricted to the scope of the claim. Thereby, it is assured that the amended claims 5,6,8 are based on the original claims, the new claim 9 is moot so the applicant has to cancel it. The relation of the new claims with respect to the original claims are illustrated in the following.

LIST OF CLAIMS:

Claims (Cancelled) 1 –4.

Claim (currently amended) [[5]] 1. A threaded rod device of manufacturing a nylon zipper comprising two parallel threaded rods; each threaded rod having threads; one of the threaded rod having a plurality of tips arranged in recesses between each two threads, the tips are formed as a single straight bank on the recesses of the threads of the threaded rod and is in the middle section of the threaded rod.

Claim (currently amended)[[6]] 2. A threaded rod device of manufacturing a nylon zipper as claimed in claim [[5]] 1 , wherein a top of each tip has a concave recess so that the concave portion is a cambered recess without any sharp region.

Claim (cancelled) 7.

Claim (currently amended) [[8]] 3. A threaded rod device of manufacturing a nylon zipper as claimed in claim [[5]]1 , wherein the plurality of cambered tips are straightly arranged at a middle section of the threaded rod.

Claim (cancelled) 9.

Since in above discussion, it is apparent that no prior art has the features of the present invention, especially in the amended claim 5. Furthermore, as we know that no other prior art has features of the present invention. Thus, the present invention is novel and inventive.

It is now believed that the subject Patent Application has been placed in condition for allowance, and such action is respectively requested.

Respectfully submitted.

Wu, Hsin-Kun
